

New Building Safety Protocols

Following the guidelines for [businesses](#) and [summer programs](#) reopening in Phase 4 of Restore Illinois.

Cleaning Procedures

- **Lillstreet will hire a full-time custodian** and 2 additional part-time cleaning staff members, who will routinely clean each day, Monday–Sunday.
- **Classrooms will be completely sanitized** between classes throughout the day.
- **Increased hand sanitizer stations** can be found throughout our building.
- **Doors and windows will remain open** wherever possible in order to increase ventilation.

Class size Limitations

- **Class sizes will be limited to no more than 10 students.** This number will vary in each classroom to meet social distancing guidelines.

Student Precautions and Protocols

- **Self-Health screenings are required before entry:** check to see if you are exhibiting any [Covid-19 symptoms](#) prior to building entry. If you do have symptoms, wait to enter premises until you have had no fever for at least 72 hours, other symptoms have improved, and at least 10 days have passed since your symptoms first appeared.
- **Before entering your classroom, please use hand sanitizer.** We will have sanitizer available outside of each classroom.
- **All students must maintain a 6-foot distance** between non-household individuals when possible.
- **Masks must be kept on at all times while inside our building,** unless you have a health issue that inhibits your ability to do so. If you are unable to wear a mask inside our building, please contact us at lillstreet@lillstreet.com so we are aware of the exception.
- **Pre-class check-ins:** Check-ins will no longer take place in-person, at the front desk, prior to your first class meeting. You will receive specific check-in information the week before your class begins.
- **Water fountains will no longer be available for use.** Please be sure to bring your own water!
